Gaia & Artizan

Explore the unique art of tea with small and unique teapots. They allow more careful temperature control and while reducing the bitterness that may occur in the flavour of the tea and increasing its aroma. Their shape helps the tea leaves to expand and mix better with water. Now, Bonna Premium Porcelain has a new collection: Herbal Tea Pot Gaia and Herbal Tea Pot Artizan. These new teapots unearth tea's medicinal and spiritual paths and rituals in every brew. Reflecting Bonna's gratitude for the earth and appreciation of luxury presentations, they radiate tea's history with unique colours and a luxurious bamboo handle.

Notte

Inspired by the Italian word for “night”, NOTTE takes a privileged place on the table with the strong presence of black: the color for dignity, power and mystery. Thanks to the black glaze application covering the whole body, NOTTE pieces keep all the secrets the chef whispers to the plate; they only let the vivid colors and shapes of the presentation speak for themselves.

Blue Wave

The Blue Wave Collection offered by Bonna is an elegant and evocative series. This collection features a blue wave motif on white porcelain, serving as a powerful symbol of the natural world. The Blue Wave Collection reminds us of the power and beauty of the sea—a force of nature that is both calming and invigorating. The wave also symbolizes change and possibilities, representing the constant ebb and flow of life. Chefs are not immune to the impact of this symbolism. They understand the inspiring power of the natural world on creativity. The Blue Wave Collection is recognized by chefs as a source of inspiration for their own culinary creations.

Sway

The Sway Collection weaves a tale of rhythmic elegance inspired by the art of weaving. Evoking the tactile sensation of knitting and weaving, each piece creates a harmonious dance of textures. The rocking effect inherent in weaving gives birth to the collection's name, "Sway," mirroring the graceful movements found in dance and music. Craftsmanship and fluidity intertwine in a symphony of style, transforming any dining experience with Sway.

Viento

All avenues of Mediterranean region stretch out to blue, and all winds carry inviting aromas of exquisite flavors. We bring the original texture of Portuguese pavement to the background of Viento Collection, and decorated the rest with Mediterranean blue colored patterns each hand drawn individually. Viento simply became the elaborate symbol of a never ending summer on the table.

Product Care

Porcelain Care

- You can safely use decorated, hand-painted, or white porcelain products in ovens, microwaves, and freezers.
- It is not advised to move porcelain from a hot oven to a freezer or vice versa because porcelain is a hard but delicate substance that can break with sudden changes in temperature.
- You should not put porcelain on open fire unless it is designed especially for that purpose. (Example: Eared dish)
- In the case of black marks on the porcelain surface caused by metal cutlery, an appropriate steel cleaner or vinegar can be used to remove the marks.
- Caution is advised not to rub metal hardware with Porcelain while washing by hand or in a dishwasher.
- You should not use metal washing wire and tough scrub sponges when washing Porcelain surfaces.

Glass Care

- Glass material is safe to use in food storage and for hot and cold food. Food can be directly stored or served with glass products.
- Glass is a recyclable material and safe for human health.
- All glass products are dishwasher safe including industrial dishwashers. It is advised to avoid harsh chemicals to clean the glass products. Harsh chemicals might corrode the surface of the products.
- Do not scrape the food leftovers with a metal utensil to avoid any damages on the product.
- Over stacking is not recommended as glass is a fragile material.
- It is not safe to use the glass products in oven and microwave. Additionally, direct flame, excessive heat or sudden temperature changes should be avoided for product safety.
- Always wash all the glass product before using for the first time.

Wood Care

- Before using for the first time, scrub with saline water, wipe off in time, and leave to dry. For daily maintenance, it can be wiped with olive oil.
- The surface of the wooden board can be damaged when knocked with harder materials.
- Solid wood boards have natural surface textures; therefore, they may differ in their appearances.
- Avoid soaking the wooden board for too long. To prevent bacteria growth, wash and dry it in time.
- Vegetables, meat, fruit, and other food materials can be easily processed on the wooden board. However, avoid too much chopping of hard food materials such as bones to prevent the wooden board from being damaged.
- It is not advised to leave wooden products in damp places for a long time.
- Avoid exposing wood materials to the sun for a long time. Increased loss of moisture could lead to wood cracking.
- It is recommended to use a soft cloth when cleaning. Never use metal wire for cleaning.
- You can wipe the surface with olive oil to extend the useful life of wood products and remove knife traces.

Stainless Steel Maintenance

- Stainless Steel is much more resistant to staining or scratching than other metals, but contact with certain substances can trigger the process that causes staining and corrosion.
- Things to consider to avoid this process and maintain the quality of your cutlery:
- Storage Conditions: Do not store the products in humid and humid environments against the risk of corrosion. Do not expose to direct fire, this may cause marks on the product.
- Waiting for a long time with tap water, oils and cooking water containing acid, lemon juice, lime, and mineral salts may cause corrosion. Do not soak in chemical detergents such as bleach and other abrasive materials.

Product Care

Dishwasher Care

- We specially designed our products to withstand the harsh conditions of the gastronomy industry, including automatic dishwashing common to most businesses.
- Before washing cutlery, make sure that we remove all food residues before pre-rinsing, washing. Follow the manufacturer's instructions, especially regarding adding dishwasher salt, as excess salt can spoil it. Wash the cutlery as soon as possible, do not leave it in food residues for a long time.
- We recommend it to place the cutlery vertically with the heads of the dishwashers up, and not placing them too tightly helps to use water during washing. Remove the cutlery immediately after completing the washing/drying cycle and wipe them with a soft, dry cloth.
- If the cutlery is allowed to cool on its own in the dishwasher, traces of mineral salts, limescale and dishwasher salt residues can settle on the damp impact cutlery and set up to affect pitting and staining. Never wash stainless steel and silver-plated cutlery together in the same compartment of the dishwasher. The chemical values between the detergent and the steel can cause chasing in silver products. Do not use the rinse and soak programs for cutlery in dishwashers. This may cause damage to the cutlery from the soaking process.
- Electrical leakages can cause deterioration of arc carriers, tanks. To avoid this situation, make sure that your dishwasher has a grounding line.
- Never use metal wire or brush when cleaning forks, knives and spoons.
